ZerOS Wing

ZerOS Wing can be added onto any ZerOS console, or Phantom ZerOS - the offline PC editor, to increase the number of channels or playback faders available. ZerOS Wing does not increase the total number of playbacks or channels available, just the number of faders available at any one time.

ZerOS Server

ZerOS Server is a 1U high DMX generator, running the ZerOS Operating System and emulating an iCAN Source Controller. Designed to be used in both entertainment and architectural situations, the ZerOS Server is able to backup FLX consoles or work stand-alone, triggering entertainment style lighting via an architectural lighting control network.

ZerOS Server can emulate any ZerOS console. Feature availability is based upon whichever console it's currently emulating. This manual is written for ZerOS Server running as FLX which is the default Desk Type. [Click here to find out more about Desk Types.](#)
